MERCHANDAM FOR THE SECOND

18 January 1955

HURLINCT:	Meeting on	ionalbi	· Beduct!	ion of EEC	Coverage.	. Action	to be
	taken by F	sis in t	be face o	of imevit	Mble SEC	budget e	ute.

***********	•	
Fresent:	1	

The general situation was reviewed end the following points were brought out:

STAT

STAT

- (a) ENC Monitoring service is experently quite slarmed over the expected or actual reduction in their budget as evidenced by the urgest meaner in which the meeting has been set up for nic-March.
- (b) FBIS is interested in only two aspects of the BBC sparation. Those are: all monitoring coverage and monitors' texting; and the communications from Cyprus to Landon. All other BBC MS activities are extransous to FBIS requirements. It was recognized, however, that BBC MS must provide a mechanism for handling its monitored product, as well as the various essential support activities such as engineering and cruining.
- (a) If a severe budget cut has to be ande in spite of rejeated representations, FBIS to BBC, DD/I to British and even the DCI to Viscount Alexander, it will do no good to reiterate the necessity for precerving coverage in the March joint meeting. Campbell is unquestionably faced with the problem of reducing his activities to fit the funds evaluable. It would seem, therefore, that FBIS abould attempt to assist him in solving his problem in a manner that will be least detrimental to our everall coverage.

It was decided that FBIS should scrutinize the following:

- (a) The possibility of relieving BBC of its Baltic and Northmest USER coverage through the establishment of an FFIS station at Stockholm, Belsinki, or Coponingen, in that order of preference.
- (b) The possibility of relieving the BBC MS from the expenditure of \$25,000 per annum for the Cable & Virgines circuit as a first proposal, and provided Commo could make the necessary arrangements. FBIS would prefer to file its unterial from Cyprus via the State Department communications center at Microsia to Meidelberg for relay to London and Machington. In this instance it was noted that the Meidelberg to London circuits are already well loaded and an additional line would probably have to be necessed.

This is very likely to fail since C & wenintains the right to transmit Cypros originated traffic and would not likely be villing to waive this agreement at the cost of & 2),000 per year to them. PBIE, in that case, might be forced to adopt the simplest solution of assuming the EBC contract with C & W.

- (e) A careful review of the broadcasting of the countries to which MSC is presently listening in comparison to present RSC coverage of those countries and languages. This review should be designed to transferring whole languages and/or services or countries to existing FSIS bureaus. For example: coverage of Rungary might be transferred in its entirety to the Mediterraneous Suresa or coverage of the Vatiens might be transferred to Frankfurt. Those are marely illustrative examples.
- (6) Commideration should slee be given to BBC's problem of paying for receipt of the TASS Hellschreiber Services and the upcoming problem of Beuters' exclusive agreement with DFA. STAT
